

CODI "Collector Of Dropped Items"

CODI is a bag intended to protect the area under a working position from accidentally dropped items.

A CODI can be clipped to an operator's harness, rigged from a rope or suspended on one or two pints on a wall.

Built on a rigid aluminum frame that can be folded, without tools, for transport.

CODI is built on John Middendorf's D4 portaledge design:

- Curved Corners
- Hybrid-Diameter Tubing
- Bullet joiners

Description

Frame

- Aluminum frame 90x150 cm
- Foldable to ~90x40 cm
- Suspension connections in four corners

Bag

- ~60 cm deep
- Folds together with frame
- Made of PVC coated tarpaulin, 680 g/sqm
- 12 colors to choose from

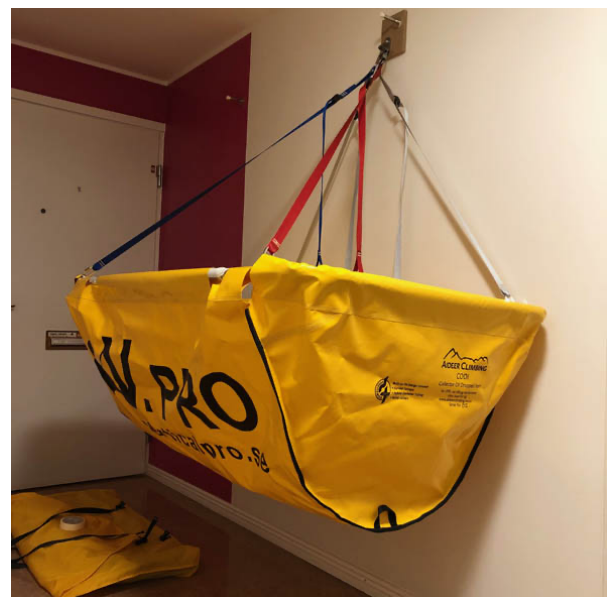

Suspension

- 1" polyester webbing individually connected to four points.
- Four buckles for adjusting length of suspension
- Connected by 6 mm quick links

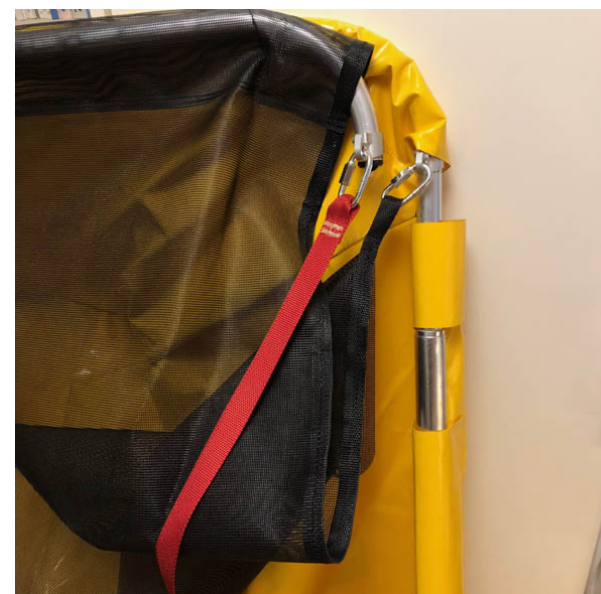

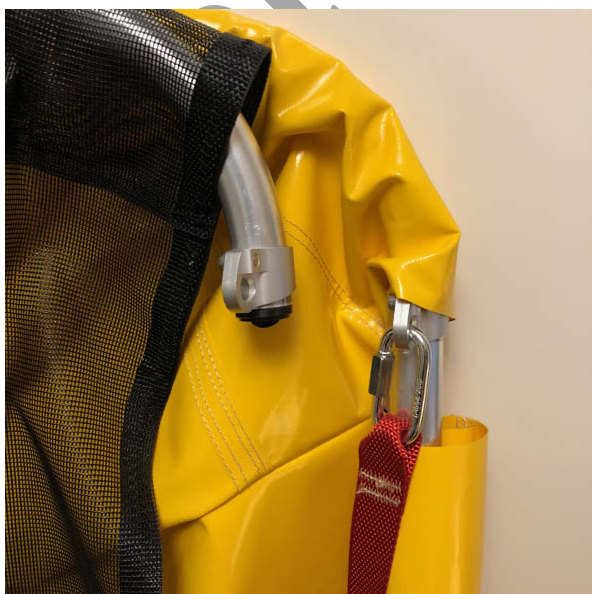

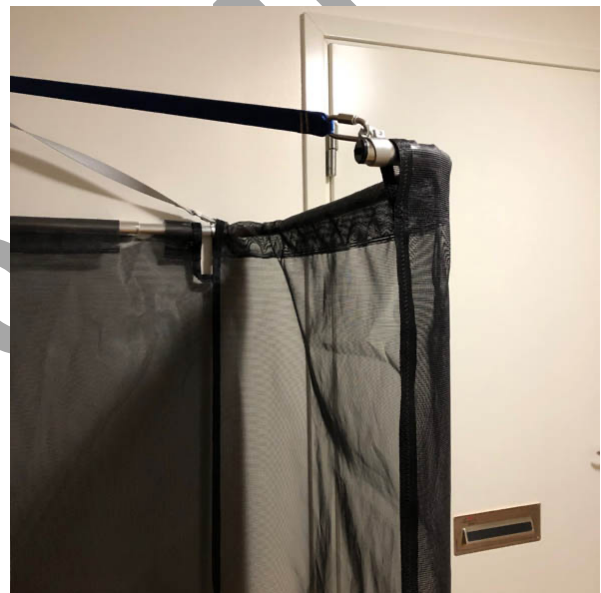

Printing

- There is one area of ~110x60 cm that can be printed on each side of the bag
- Full colour printing available
- The printing is not opaque, so the printed colour are changed by the fabric colour, except for the white fabric. See price info for more details.

Option

- A three-sided PVC coated polyester net can be rigged above the bag
- Additional height is ~95 cm and the net go down ~20 cm into the bag
- It folds down to same size as bag
- To rig it you disconnect the suspension from bag frame. The net has quick links that shall be connected to bag frame. And then connect the suspension to net frame

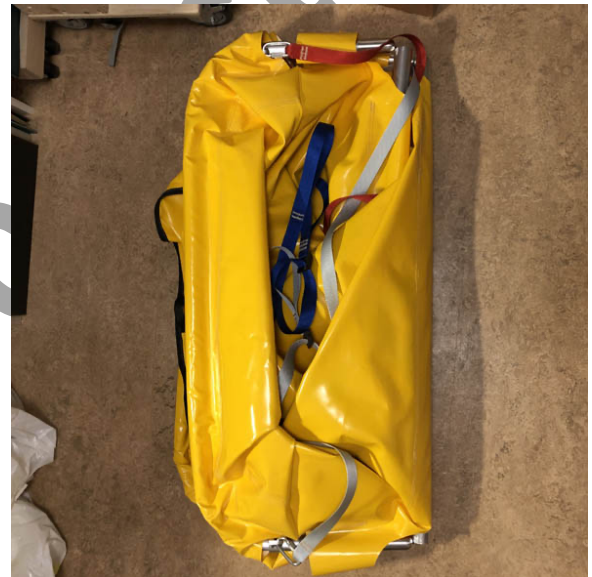

Weight

- Weight of bag, 680 gram fabric, 5 kg
- Weight of net, 3 kg

Specification

- Max load 50 kg, not rated as lifting equipment
- No PPE

Delivered in a transport bag, 95x45x15 cm
