

THE "AIDEER"

6 STEP STANDARD AIDER FROM AIDEER CLIMBING

Parts, measurements and specifications:

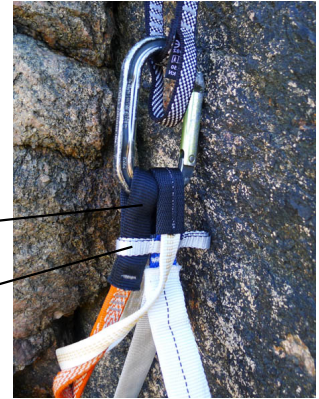

Measurements from top (downside of biner)

- Reinforced biner loop
- Loop to keep daisy chain and aider together on biner
- Hero loop, *only body weight*
- Reinforced upper part
- Step 1 with integrated spreader bar of Fiberglass
30 cm (11.8") below biner
- Step 2, 52 cm (20.5") below biner
- Step 3, 74 cm (29.1") below biner
- Step 4, 105 cm (41.3") below biner
- Step 5, 136 cm (53.5") below biner
- Step 6, 165 cm (65") below biner

Webbing for ladder: 20 mm (3/4") polyester
 Webbing for steps: 30 mm (1.2") polyester supported by plastic rail and 20 mm (3/4") polyester webbing underneath
 Weight: 225 grams (7.9 oz) for each ladder

Step 1 is 12,5 cm (5") wide and step 2-6 are 16,5 cm (6,5") wide

When standing in aider you stand ~5 cm (2") below these measurements

Please don't FiFi hook on upper step, you will break the spreader bar!

And if you absolutely have to FiFi hook the upper step, place FiFi as far to one side you can, see picture

*** IMPORTANT ***

No part of these aiders is designed, or intended, for use as safety equipment! No fall protection, only body weight!
